DETAILED ACTION

1. This is in response to the applicant's communication filed on September 26, 2001, wherein claims 1-43 are currently pending.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on March 18, 2004 is being considered by the examiner.

Claim Objections

3. Claims 8 and 9 are objected to because of the following informalities: There appears to be typographical errors. The applicant has typed the language "of a response of a response" twice. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1 and 11 recite the limitations "the type of transaction," and "the product". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-43 are rejected under 35 U.S.C. 102(e) as being anticipated by Lederer et al (US 2002/0023109) (hereinafter referred to as Lederer).

Referring to Claims 1, 20, and 26:

Lederer discloses a method, system and program for maintaining, retrieving, and evaluating information related to a potential business transaction between parties in different jurisdictions using electronic versions of rules from such jurisdictions that apply to the transaction comprising the steps of:

submitting a query via a user interface to a database that stores the electronic versions of the rules, the query containing information about the type of transaction, the product involved in the transaction and the jurisdictions involved in the transaction [0013], [0040], [0070], [0100]and [0104];

retrieving, via a server in communication with the database, jurisdictional rules from the database that are related to the specified product, transaction type and jurisdiction [0040] and [0042];

Art Unit: 3629

formulating a response based on the retrieved information containing general and specific jurisdictional rules that apply to the transaction and specific requirements for the transaction [0040] and [0042-0043]; and

sending the response to the entity submitting the query [0055].

Referring to Claim 2:

Lederer discloses the formulated response further contains a profile of the potential transaction described in the submitted query, the profile including information on product type restrictions, product tariffs and product quantity limits [0039], [0042], [0043] [0049] and [0058-0060].

Referring to Claims 3 and 27:

Lederer discloses before the query submitting step, the step of registering for access to the electronic versions of rules from jurisdictions [0046-0047], [0072].

Referring to Claims 4 and 28:

Lederer discloses after the response sending step, the step of retrieving the formulated query response at the customer location [0040] and [0055], [0077];

evaluating the query response [0055];

determining whether the query response is satisfactory to the customer [0055] ;

and

resubmitting the reformulated query to a database that stores the electronic versions of the rules, the query containing information about the type of transaction, the product involved in the transaction and the jurisdiction involved in the transaction [0079], [0092] [0095].

Referring to Claims 5 and 29:

Lederer discloses after the response sending step, the step of retrieving the formulated query response at the customer location [0055];

evaluating the query response [0055];

determining whether the query response is satisfactory to the customer [0055];

and

when a new query is desired, submitting a new query to a database that stores the electronic version of the rules [0100].

Referring to Claims 6 and 30:

Lederer discloses the step of establishing a connection between a customer and the server and associated database containing the electronic version of the rules, regulations and laws from the jurisdiction [0013].

Referring to Claims 7 and 31:

Lederer discloses the step of determining whether a customer is registered to access the server and database and accepting customer submitted query when the customer is registered to access the server and database [0046], [0072].

Referring to Claims 8 and 32:

Lederer discloses processing the submitted query and identifying the specific request in the query [0040] [0071-0072];

determining whether the query contains sufficient information to enable the generation of a response to the query [0053]; and

Art Unit: 3629

sending the request for more information to the customer, if the determination is that there is not enough information to respond to the request in the query [0100].

Referring to Claims 9-10 and 33-34:

Lederer discloses processing the submitted query and identifying the specific request in the query [0040] [0071-0072];

determining whether the query contains sufficient information to enable the generation of a response to the query [0053]; and

generating a response based on the retrieved information, said response containing general and specific jurisdictional rules that apply to the transaction and specific requirements for the transaction [0054];

retrieving the formulated query response at the customer location [0055];

evaluating the query response [0055];

determining whether the query response is satisfactory to the customer [0090];

and

when the determination of the response is not satisfactory and a new query is desired, reformulating the original query [[0092-0095],

resubmitting a new query/ reformulated query to a database that stores the electronic versions of the rules, the query containing the necessary information [0013].

Referring to Claims 11 and 35:

Lederer discloses a method for evaluating a potential business transaction between parties in different jurisdictions using electronic versions of rules from such jurisdictions that apply to the potential transaction comprising the steps of:

retrieving a submitted query, the query containing information about the type of transaction, the product involved in the transaction and the jurisdiction involved in the transaction [0013];

identifying transaction type, product type and jurisdiction information contained in the query [0072], [0077];

retrieving information from a database that stores the electronic versions of the rules [0013] [0040];

generating a profile of a potential business transaction based on the information and the rules retrieved from the database that apply to the potential transaction [0058-0060]; and

sending the transaction profile to the entity submitting the query [0058-0060].

Referring to Claims 12 and 36:

Lederer discloses storing the transaction profile in a section of the database [0058-0060], [0064], [0072].

Referring to Claims 13 and 37:

Lederer discloses the stored transaction profile is arranged in the database according to the jurisdiction and product type [0064].

Referring to Claims 14 and 38:

Lederer discloses generating a general transaction profile for a particular country and product, the general transaction profile being stored in the database and retrieved when a query contains the jurisdiction and product type listed in the profile [0042], [0064].

Referring to Claims 15 and 39:

Lederer discloses the general profile generation step comprising submitting transaction data to a profile generating mechanism, the data comprising a product, a product quantity for the transaction, an export jurisdiction and an import jurisdiction [0042-0043], [0053-0054].

Referring to Claim 16:

Lederer discloses the submitted data is from transaction profiles stored in the database [0049], [0059], [0072].

Referring to Claim 17:

Lederer discloses wherein the submitted data is arbitrarily generated in the database [0049], [0059].

Referring to Claims 18 and 40:

Lederer discloses the step of retrieving a transaction profile comprises identifying the product involved in the transaction [0064],[0072];

identify the export and import jurisdiction [0038], [0042], [0053-0054];

searching the database for a profile having the identified product and import/export jurisdiction [0064], [0072] and ; and

returning a profile transaction profile that matches the identified product, jurisdiction [0053-0055], [0071-0072].

Referring to Claims 19 and 41:

Lederer discloses the step of retrieving a transaction profile comprises the steps of:

Art Unit: 3629

identifying the product involved [0013], [0040], [0054];

identifying the jurisdiction [0054];

searching the database for a profile having the identified information [0053-0054];

generating a transaction profile [0055], [0058-0060].

Referring to Claims 21-25:

Lederer discloses a system comprising multiple servers, databases, a uniform format converter and a uniform format database [[0141-0144].

Referring to Claims 42-43:

Lederer discloses wherein the connection and communication occurs over a wireless communication network [0061].
